Dear Mrs. Barak,

We look forward to Mr. Barak's visit to PCI on June 2 starting around 10 am. We are flexible to start when he may arrive. Please let me know if others will be coming and their names.

He will be meeting the following leaders as well as others
GERI: Brian Kay, General Technical Manager
PCI: Kevin Burns, President
Subir Roychoudhury, Vice President Science and Technology
Rich Mastanduno, Director of Engineering
Dr. Ben Baird, Downhole steam generator technical leader and Senior Combustion Research Engineer
Curt Morgan, Downhole steam generator project manager and Senior Project Engineer
Dr. Marie Zuckerman, IP specialist

Below I have a tentative agenda, which can be tailored to fit his specific interests:

Objectives:
· Meet and get to know the GERI/PCI team
• Introduction to PCI – who we are, what we do
• Better understand the Downhole Steam Generator opportunity
· Discussion of topics of interest

Tentative agenda (with discussion throughout)
10 am: Introductions to the team
10:15 Introduction to PCI
10:45 Downhole steam opportunity
o Summary of opportunity
o The problem being addressed/current surface steam technology
o Our technology as a breakthrough solution (degree of detail here is up to Mr. Barak)
o Potential benefits, risks and value creation
12:30 Plant tour (including view of the manufactured alpha tool ready for test in Canada)
1:00 Lunch (lunch will be brought in – please let us know of any food requirements or preferences: Sandwiches? Lasagna? Other?)
1:30 (Continuing)
o Target market entry segments and drivers
o Broader opportunities for future penetration
o Plan forward (alpha, beta, gamma, 50 MM BTU/hr, scaleup)
o Other possibilities

• Interaction to explore issues of interest to Mr. Barak

Depending upon his specific interest, we can easily go until 4-5 pm. Please confirm if this late is ok. We can also streamline to fit into less time if desired.

If he has time, we would be pleased to also take him to dinner, which could be early so he could return to New York City in the evening or could extend later if he wishes to spend the night. If he wishes to spend the night, we can recommend good hotels (e.g. The Study at Yale).

We are approximately 1.75 hours from Manhattan, and the directions and times you will travel will mean relatively easy traffic (one hopes). (I assume he will be coming by car, but train is also possible to nearby New Haven station (10 minutes away); if this is easier, we could pick him up at the station.)

Directions from New York are at our website at http://www.precision-combustion.com/contact.html. Our address is 410 Sackett Point Road, North Haven, CT 06473, a short distance off Route 91 from New Haven to Hartford. The final ¼ mile is along a private access road starting at 410 Sackett Point.

Please let me know of any changes he may wish or further clarification of his specific interests, and feel free to contact me with any questions.

Best regards,

Kevin Burns
President
